## WESTERN AMERICAN ALPINES

and

Native plants of Montana, Idaho and Northern Wyoming.

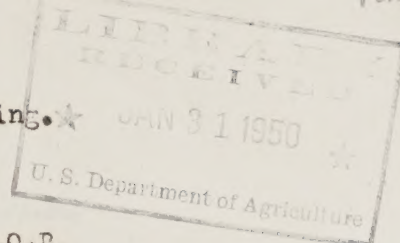

Remember, please, your source of supply,

FRANK H. ROST,

1020 Poplar Street, Missoula, Montana.

From this list, 25 each of 25 species for 25.00. F.O.D.

5 each of 30 species for 15.00.

Frankly, I am looking for someone in your town, in any town, interested or apt to become interested in our many good native plants. My collecting area, three states, is too vast to cover for scattered plants without making the cost per plant too high. Many plants are abundant enough and not too hard to dig after their habitat is reached. The first one costs nearly as much for travel as 25 or 100.

Here are listed 100 or more such plants. Check 30 or more, (some I may not find) your choice, of the following species. Return with your remittance or credit rating. Your plants will come as available, mostly in April-May or in September; and will be of your selection. Order now to have your plants on my collecting list.
